1. Because H is in the 5th column next to a window, E must be in the 4th column.
2. This sets G on the bed in the 8th row.
3. F may only be in the 3rd column, because neither C or B could be in the Dining Room with her (B would block G and there is no carpet for C).
4. This isolates C in the 1st column, and F in the 5th row.
5. This isolates both E and D, which then isolates B and G.
6. There is only one tile left for A, he murdered V in the woods.
